1. Executive Summary: The Empire English Vision

Mission Statement

To build a system-driven learning operating system that transforms absolute beginners into native-like English speakers through structured execution, community immersion, and American accent mastery — independent of instructor quality or geographic location.

The **Empire English Community System** is not a course. It is a **Learning Operating System** — a complete ecosystem designed to take learners from zero English knowledge to advanced fluency with native-like American pronunciation. The system replaces instructor-dependent learning with structured, community-driven execution that ensures continuous progression through measurable milestones.

This blueprint contains every component required to implement, operate, and scale the Empire English Community System from an initial pilot of 10 members to a global platform serving thousands of learners. Every element in this document is execution-ready, not theoretical.

1.1 Core Philosophy: System Over Instructor

Traditional English education fails because it depends on instructor quality, textbook selection, and classroom logistics. Empire English inverts this model. Success is driven by **system design**, not teacher talent. The system generates learning materials, enforces practice schedules, measures progress, and creates accountability through community structure.

Table 1 Traditional Model vs. Empire English System

Dimension	Traditional Model	Empire English System
Success Driver	Instructor quality and charisma	System design and learner execution
Learning Environment	Scheduled classroom sessions	Continuous community immersion
Practice Volume	2-3 hours per week in class	2-4 hours per day, every day
Speaking Time	Limited to class participation	Daily structured speaking missions
Accent Training	Usually neglected or optional	Integrated from day one, every level
Progress Tracking	Periodic tests, vague feedback	Weekly measurable assessments

Material Source	Fixed textbooks	AI-generated, personalized content
Scalability	Limited by instructor availability	Unlimited, system-driven
Cost Efficiency	High cost per student	Fixed system cost, infinite scale
Lifelong Learning	Ends when course ends	Community membership continues indefinitely

1.2 System Architecture Overview

The Empire English Community System operates through four integrated layers:

LAYER 1: PROGRESSION ENGINE (THE CURRICULUM)

Four-level learning pathway from absolute beginner to native-like fluency. Each level contains defined learning objectives, daily execution tasks, skill integration requirements, and measurable advancement criteria. The progression engine ensures no learner advances without demonstrated competency.

LAYER 2: EXECUTION ENGINE (THE DAILY LOOP)

A structured daily learning protocol that integrates speaking practice, listening exposure, writing exercises, shadowing drills, and American accent training. The execution engine is the same at every level — only the content difficulty changes. This creates operational simplicity behind sophisticated learning architecture.

LAYER 3: COMMUNITY ENGINE (DISCORD ECOSYSTEM)

A purpose-built Discord server architecture with level-organized voice lounges, text channels, English-only environment enforcement, peer-to-peer learning structures, and strict accountability systems. The community creates immersion, accountability, and social pressure to execute.

LAYER 4: AI ENGINE (THE CONTENT FACTORY)

A comprehensive prompt ecosystem that generates cheat sheets, speaking exercises, listening materials, evaluation rubrics, grammar explanations, and vocabulary lists on demand. The AI engine eliminates content creation bottlenecks and enables infinite personalization at zero marginal cost.

1.3 Key Differentiators

American Accent from Day One. Unlike traditional programs that treat pronunciation as an advanced skill, Empire English integrates accent training from Level 0. Every learner practices phonetics, shadowing, and pronunciation drills from their first day, ensuring accent improvement parallels fluency development.

Community as Classroom. Learning happens in a Discord community, not a classroom. Voice lounges operate 24/7 for speaking practice. Text channels enforce English-only communication. Peer accountability replaces instructor supervision. The community never closes — learning continues around the clock.

System-Driven, Not Instructor-Driven. The system defines what to study, when to practice, how to measure progress, and when to advance. AI generates materials. Community provides accountability. Instructors become facilitators, not bottlenecks. This enables unlimited scaling without quality degradation.

Execution Over Theory. Every daily task requires active production — speaking, writing, shadowing, recording. Passive consumption (watching videos, reading rules) is limited to 20% of learning time. Active practice dominates the other 80%.

Measurable Everything. Weekly assessments produce numeric scores for fluency, comprehension, pronunciation, and consistency. Monthly reviews compare scores to identify trends. Level advancement requires passing standardized evaluations. No learner progresses without demonstrated competence.

System Design Principles

Simplicity in execution. The daily loop is identical at every level — only content changes. Learners never need to learn new systems as they advance.

Strong underlying structure. Behind the simple daily interface lies sophisticated curriculum design, AI content generation, and community architecture.

Versioned evolution. This is Version 1.0. The system improves through iteration, not redesign. Every cohort generates data for optimization.

Scalable by design. From 10 VIP pilot members to millions of users — the same system architecture serves all scales.

2. The Four-Level Progression System

The Empire English Community System uses a four-level progression architecture. Each level represents a distinct phase of English competency, with clear entry requirements, defined learning objectives, structured daily execution, and measurable advancement criteria. Learners cannot skip levels or advance without passing standardized evaluations.

2.0 Level Progression Overview

Table 2 Level Progression Summary

Level	Name	Duration	Target Competency	Daily Hours
Level 0	Absolute Beginner	8-12 weeks	Basic alphabet, 500 words, simple sentences	1.5 - 2 hours
Level 1	Survival English	10-14 weeks	Daily conversation, 1,500 words, present/past tense	2 - 2.5 hours
Level 2	Communication Stage	12-16 weeks	Complex topics, 3,000 words, all tenses, native speed listening	2.5 - 3 hours
Level 3	Fluency + Native Accent	Ongoing	Native-like flow, 5,000+ words, accent refinement, idiomatic expression	3+ hours

2.1 Level 0: Absolute Beginner (Zero English)

LEVEL 0 — ABSOLUTE BEGINNER

TARGET PROFILE

Learners who know zero English or only recognize the alphabet. May struggle to introduce themselves or understand simple greetings. This level builds the absolute foundation for all subsequent learning.

DURATION

8-12 weeks (56-84 days of active study)

DAILY TIME COMMITMENT

1.5 - 2 hours per day

Learning Objectives

Table 3 Level 0 Learning Objectives

Skill	Objective	Success Criteria
Speaking	Produce basic greetings, introductions, and simple sentences	Can introduce self, name, origin, and basic daily activities without script
Listening	Understand slow, clear English at 60-80 words per minute	Can comprehend simple instructions and basic questions
Reading	Recognize 500 high-frequency words and simple sentences	Can read and understand basic signs, menus, and short messages
Writing	Write simple sentences about self and daily routines	Can write 3-5 sentences describing daily activities with correct word order
Pronunciation	Master all 44 English phonemes individually	Can produce each phoneme in isolation with 80% accuracy
Grammar	Understand subject-verb-object order, present simple, basic questions	Can form simple statements and yes/no questions correctly

Daily Execution Tasks (Level 0)

Table 4 Level 0 Daily Learning Protocol

Time Block	Activity	Duration	Description
Morning	Phoneme Drills	20 min	Practice 5 phonemes daily using minimal pairs. Record and compare to native audio.
Morning	Vocabulary Acquisition	20 min	Learn 10 new high-frequency words using image association and spoken repetition.
Morning	Shadowing (Slow)	15 min	Listen to slow, clear audio (60 WPM) and repeat immediately, matching rhythm and intonation.
Afternoon	Speaking Mission	20 min	Complete structured speaking task (e.g., "Introduce yourself for 60 seconds"). Record and submit.
Afternoon	Listening Exercise	15 min	Listen to level-appropriate audio and answer comprehension questions verbally.
Evening	Writing Practice	15 min	Write 5 sentences using today's vocabulary. Submit for AI correction.
Evening	Community Participation	15 min	Post in text channel or join voice lounge for structured practice.

Measurable Progression Indicators (Level 0)

- **Vocabulary:** Weekly test showing retention of 80%+ of 70 new words (10 words x 7 days)
- **Phoneme Mastery:** Weekly phoneme assessment — must achieve 80% accuracy on all 44 phonemes by week 8
- **Speaking Fluency:** Can speak continuously for 30 seconds without pausing (by week 6) and 60 seconds (by week 10)
- **Listening Comprehension:** Scores 70%+ on weekly listening assessments
- **Writing Accuracy:** Submits writing with 80%+ grammatical correctness
- **Consistency:** Completes 85%+ of daily tasks every week

Level 0 Advancement Requirements

To advance to Level 1, learners must achieve ALL of the following:

1. Pass the Level 0 Exit Examination (70% minimum score)

2. Demonstrate mastery of all 44 English phonemes (80% accuracy)
3. Score 500+ on the placement vocabulary test
4. Deliver a 60-second unscripted self-introduction with 80% grammatical accuracy
5. Maintain 85%+ task completion rate for the final 3 weeks

2.2 Level 1: Survival English

LEVEL 1 — SURVIVAL ENGLISH

TARGET PROFILE

Learners who can introduce themselves and understand simple English. Can handle basic greetings but struggle with real conversations. This level builds practical conversational ability for everyday situations.

DURATION

10-14 weeks (70-98 days of active study)

DAILY TIME COMMITMENT

2 - 2.5 hours per day

Learning Objectives

Table 5 Level 1 Learning Objectives

Skill	Objective	Success Criteria
Speaking	Handle daily conversations: shopping, directions, ordering food, small talk	Can sustain 2-3 minute conversation on familiar topics without preparation
Listening	Understand natural speech at 100-120 WPM with clear pronunciation	Can follow conversations between native speakers on familiar topics
Reading	Recognize 1,500 words; read simple articles and short stories	Can read and summarize a 300-word article with 70% comprehension
Writing	Write short paragraphs and simple messages	Can write a 100-word email or message with 80% grammatical accuracy

Pronunciation	Master basic word stress, sentence rhythm, and linking	Can produce correct word stress on 2-3 syllable words; demonstrates basic linking
Grammar	Master present simple, present continuous, past simple, future with "going to" and "will"	Can use all basic tenses accurately in conversation

Daily Execution Tasks (Level 1)

Table 6 Level 1 Daily Learning Protocol

Time Block	Activity	Duration	Description
Morning	Accent Drill: Stress & Rhythm	20 min	Practice word stress patterns (2-3 syllable words) and sentence rhythm drills. Record and analyze.
Morning	Vocabulary Expansion	20 min	Learn 12 new words daily using context sentences and spoken practice. Focus on survival vocabulary.
Morning	Shadowing (Natural Speed)	20 min	Shadow native speakers at normal speed. Focus on rhythm, stress, and intonation matching.
Afternoon	Speaking Mission: Scenario Practice	25 min	Complete situational speaking task (e.g., ordering at restaurant, asking directions). Record 90-second response.
Afternoon	Listening Immersion	20 min	Listen to level-appropriate podcast or video clip. Summarize main points verbally in English.
Evening	Writing Practice	20 min	Write a short paragraph (100-120 words) on assigned topic. Submit for AI feedback.
Evening	Community Voice Lounge	25 min	Join Level 1 voice lounge for structured conversation practice with peers.

Measurable Progression Indicators (Level 1)

- **Vocabulary:** Weekly test showing 1,500+ word recognition; 80% retention of new words
- **Speaking Duration:** Can speak continuously for 2 minutes without significant pausing
- **Listening Comprehension:** Scores 75%+ on listening assessments at 120 WPM
- **Grammar Accuracy:** Uses basic tenses with 80%+ accuracy in spontaneous speech

- **Accent Score:** Demonstrates correct word stress on 75%+ of practiced words
- **Writing:** Produces 100-word paragraphs with 80%+ grammatical accuracy
- **Consistency:** Completes 90%+ of daily tasks weekly

Level 1 Advancement Requirements

1. Pass the Level 1 Exit Examination (75% minimum score)
2. Vocabulary recognition score of 1,500+ words
3. Deliver a 2-minute unscripted monologue on a daily life topic with 80% grammatical accuracy
4. Demonstrate correct word stress on 75%+ of tested words
5. Score 75%+ on listening comprehension at 120 WPM
6. Maintain 90%+ task completion rate for final 4 weeks

2.3 Level 2: Communication Stage

LEVEL 2 — COMMUNICATION STAGE

TARGET PROFILE

Learners who can handle daily conversations and express basic needs. Can understand clear native speech but struggle with fast speech, idioms, and complex topics. This level builds true communication ability across diverse subjects.

DURATION

12-16 weeks (84-112 days of active study)

DAILY TIME COMMITMENT

2.5 - 3 hours per day

Learning Objectives

Table 7 Level 2 Learning Objectives

Skill	Objective	Success Criteria
Speaking	Discuss complex topics: opinions, explanations, comparisons, storytelling	Can sustain 5+ minute conversation on unfamiliar topics with minimal hesitation
Listening	Understand native speech at 140-160 WPM including idioms and reductions	Can follow podcasts, TV shows, and real conversations with 80% comprehension

Reading	Recognize 3,000 words; read news articles and short stories with nuance	Can read and analyze a 500-word article, identifying main arguments and tone
Writing	Write structured essays and detailed messages	Can write a 250-word essay with clear organization and 85% grammatical accuracy
Pronunciation	Master advanced linking, reduction, and intonation patterns	Demonstrates natural-sounding connected speech; uses correct intonation for questions, statements, emphasis
Grammar	Master all tenses including perfect and perfect continuous forms; conditionals; passive voice	Uses complex grammatical structures accurately in spontaneous speech

Daily Execution Tasks (Level 2)

Table 8 Level 2 Daily Learning Protocol

Time Block	Activity	Duration	Description
Morning	Accent Drill: Linking & Reduction	25 min	Practice connected speech: linking R, linking W, consonant clusters, weak forms. Shadow native dialogues.
Morning	Vocabulary: Collocations & Idioms	20 min	Learn 10 new words plus 5 collocations/idioms. Practice in original sentences spoken aloud.
Morning	Shadowing (Native Speed)	25 min	Shadow movie scenes, podcast excerpts, or news segments at full native speed. Match every nuance.
Afternoon	Speaking Mission: Complex Topics	30 min	Prepare and deliver 3-4 minute speech on assigned topic (opinion, explanation, or story). Record and submit.
Afternoon	Deep Listening	25 min	Listen to native content (podcast episode, TV scene). Transcribe key segments. Identify reductions and linking.
Evening	Writing Practice: Essays	25 min	Write a 200-250 word essay with introduction, body, conclusion. Submit for detailed AI feedback.

Evening	Community Debate Lounge	30 min	Participate in structured debates or discussions in Level 2 voice lounge. Practice argumentation in English.
----------------	----------------------------	-----------	--

Measurable Progression Indicators (Level 2)

- **Vocabulary:** Recognizes 3,000+ words; uses 50+ idioms and collocations correctly
- **Speaking Duration:** Can speak continuously for 5+ minutes on unfamiliar topics
- **Listening Comprehension:** Scores 80%+ on native-speed listening assessments (150 WPM)
- **Grammar Complexity:** Uses perfect tenses, conditionals, and passive voice with 80%+ accuracy
- **Accent Score:** Demonstrates natural connected speech with 75%+ linking accuracy
- **Writing:** Produces 250-word structured essays with 85%+ grammatical accuracy
- **Consistency:** Completes 90%+ of daily tasks weekly

Level 2 Advancement Requirements

1. Pass the Level 2 Exit Examination (80% minimum score)
2. Vocabulary recognition score of 3,000+ words
3. Deliver a 4-minute structured presentation on an unfamiliar topic with 85% accuracy
4. Demonstrate 75%+ accuracy in connected speech linking during evaluation
5. Score 80%+ on native-speed listening comprehension (150 WPM)
6. Submit a 250-word essay scoring 85%+ on grammar and organization
7. Maintain 90%+ task completion rate for final 4 weeks

2.4 Level 3: Fluency & Native-Like Accent

LEVEL 3 — FLUENCY & NATIVE-LIKE ACCENT

TARGET PROFILE

Learners who can communicate effectively on almost any topic. Can understand native speech but want to eliminate accent, speak with native-like flow, and handle nuanced, high-speed communication. This level focuses on refinement, not just advancement.

DURATION

Ongoing membership — learners remain in Level 3 as long-term community members, continuously refining toward native-like proficiency

DAILY TIME COMMITMENT

3+ hours per day (flexible, self-directed with community support)

Learning Objectives

Table 9 Level 3 Learning Objectives

Skill	Objective	Success Criteria
Speaking	Speak with native-like flow, speed, and confidence on any topic	Native speakers cannot immediately identify the speaker as non-native
Listening	Understand all varieties of native speech including slang, cultural references, and rapid conversation	Can follow movies without subtitles, fast podcasts, and group conversations with multiple speakers
Reading	Read any English material with full comprehension including nuance and subtext	Can read and analyze literature, academic papers, and news editorials with deep understanding
Writing	Write with style, voice, and near-native grammatical accuracy	Can write professional emails, creative pieces, and analytical essays that read as native-produced
Pronunciation	Eliminate residual accent through advanced phonetic refinement	Accent score of 90%+ on standardized pronunciation assessment

Grammar	Use advanced structures: subjunctive, inversion, complex conditionals, native-like patterns	Uses sophisticated grammar naturally and correctly in spontaneous speech
----------------	---	--

Daily Execution Tasks (Level 3)

Table 10 Level 3 Daily Learning Protocol

Time Block	Activity	Duration	Description
Morning	Accent Refinement: Micro-Phonetics	30 min	Focus on subtle pronunciation details: flap T, dark L, schwa usage, vowel reduction. Mirror native speakers precisely.
Morning	Native Vocabulary Expansion	20 min	Learn 8 advanced words, 5 idioms, 3 slang expressions daily. Focus on nuance and register.
Morning	Intensive Shadowing	30 min	Shadow movie scenes, stand-up comedy, or news broadcasts. Match emotion, speed, rhythm, and tone precisely.
Afternoon	Speaking Mission: Free Expression	35 min	Deliver 5+ minute speech, presentation, or argument on complex topic. Focus on flow, not just accuracy.
Afternoon	Immersion Listening	30 min	Consume native content: podcasts, TV shows, interviews. Focus on cultural references, humor, and subtext.
Evening	Advanced Writing	30 min	Write 300+ words: essays, stories, or professional communications. Focus on style and voice, not just grammar.
Evening	Community Leadership	30 min	Lead discussions in voice lounges, mentor lower-level members, participate in advanced debates. Teach to master.

Measurable Progression Indicators (Level 3)

- **Vocabulary:** Recognizes 5,000+ words; uses advanced vocabulary and slang naturally
- **Speaking Flow:** Can speak for 10+ minutes without noticeable non-native patterns
- **Listening:** Scores 90%+ on all listening assessments including rapid, accented speech
- **Accent Score:** 90%+ on standardized pronunciation assessment

- **Writing:** Produces 300+ word pieces with 95%+ accuracy and distinct personal voice
- **Mentorship:** Actively mentors Level 1-2 members weekly
- **Community Contribution:** Leads at least one voice session or discussion per week

Level 3 Mastery Certification

Level 3 has no "advancement" — it is the destination. Instead, learners pursue **Mastery Certification** through quarterly evaluations. Certification levels within Level 3:

Table 11 Level 3 Mastery Tiers

Tier	Accent Score	Speaking Duration	Native Recognition
Silver	85-89%	5 min continuous	Occasionally detected as non-native
Gold	90-94%	10 min continuous	Rarely detected as non-native in short interactions
Platinum	95%+	15+ min continuous	Native speakers assume the speaker is American

2.5 Level Advancement Criteria Summary

Every level advancement requires consistent performance across multiple dimensions. No learner advances based on a single metric or instructor discretion.

Table 12 Level Advancement Matrix

Criterion	L0 to L1	L1 to L2	L2 to L3
Exit Exam Score	70%	75%	80%
Vocabulary (words)	500	1,500	3,000
Speaking Duration	60 seconds	2 minutes	4 minutes
Grammar Accuracy	80%	80%	85%
Listening Score	70%	75%	80%
Accent Score	Phoneme 80%	Stress 75%	Linking 75%
Task Completion	85% (3 weeks)	90% (4 weeks)	90% (4 weeks)

Writing Accuracy

80%

80%

85%

Critical Rule: No Exceptions to Advancement Criteria

Learners who fail to meet any single advancement criterion remain at their current level until all criteria are satisfied. There are no exceptions, instructor overrides, or appeals. This policy maintains the integrity of the entire system and ensures every Level 3 speaker has genuinely earned their proficiency.

3. Placement & Entry System

Every learner entering the Empire English Community System must complete a structured diagnostic assessment that measures current ability across four dimensions: speaking, listening, vocabulary, and grammar awareness. The placement system ensures learners start at the correct level — neither below their ability (wasting time) nor above it (causing frustration and dropout).

3.1 Diagnostic Assessment Design

The placement test consists of four modules administered in a single 45-minute session. The test is conducted via a Discord bot or web application and produces an automated level recommendation.

MODULE 1: SPEAKING ASSESSMENT (10 MINUTES)

Part A: Read Aloud — Learner reads 3 progressively difficult passages while recording. AI analyzes pronunciation accuracy, fluency (words per minute), and phoneme production.

Part B: Spontaneous Response — Learner receives 3 prompts (e.g., "Describe your daily routine") and speaks for 60 seconds on each. AI evaluates grammatical accuracy, vocabulary range, and fluency.

Part C: Shadowing Test — Learner listens to a 15-second clip and repeats immediately. AI scores phoneme matching and rhythm accuracy.

MODULE 2: LISTENING ASSESSMENT (10 MINUTES)

Part A: Slow Speech Comprehension — 5 questions based on audio at 80 WPM.

Part B: Natural Speed Comprehension — 5 questions based on audio at 130 WPM.

Part C: Rapid Speech Comprehension — 5 questions based on audio at 160 WPM.

Questions test literal comprehension, inference, and detail recognition.

MODULE 3: VOCABULARY ASSESSMENT (10 MINUTES)

Format: 40 multiple-choice questions using the Vocabulary Size Test methodology. Words are sampled from frequency bands (1-500, 501-1000, 1001-2000, 2001-3000, 3001-5000). Learner selects correct definition from four options.

Scoring: Each frequency band contributes to the estimated vocabulary size. A learner who correctly answers 8/8 from the 1-500 band and 5/8 from the 501-1000 band has an estimated vocabulary of approximately 750 words.

MODULE 4: GRAMMAR AWARENESS ASSESSMENT (10 MINUTES)

Format: 25 multiple-choice questions covering present simple, present continuous, past simple, present perfect, future forms, conditionals, passive voice, and question formation.

Question Types: Sentence completion, error identification, and transformation exercises.

Scoring: Percentage correct, with questions weighted by difficulty level.

Placement Test Scoring Grid

Table 13 Placement Test Scoring Grid

Dimension	Level 0 Range	Level 1 Range	Level 2 Range	Level 3 Range
Speaking Score	0-30	31-55	56-75	76-100
Listening Score	0-35	36-60	61-80	81-100
Vocabulary Size	0-400 words	401-1,200	1,201-2,500	2,501+
Grammar Score	0-35%	36-60%	61-80%	81-100%

3.2 Scoring Mechanism & Level Assignment

The placement algorithm uses a **majority-rules** approach with a speaking-priority tiebreaker:

1. Score each of the four modules on a 0-100 scale
2. Map each module score to a level (0, 1, 2, or 3)
3. The level that appears most frequently across the four modules becomes the assigned level
4. In case of a tie, the **Speaking score** determines the level — speaking ability is the strongest predictor of overall communicative competence

5. If a learner scores significantly higher in one dimension than others (20+ point gap), flag for individual review

Example Placement Scenarios

Scenario A: Speaking: 45 (L1), Listening: 38 (L1), Vocabulary: 800 (L1), Grammar: 50% (L1) → **Assigned: Level 1**

Scenario B: Speaking: 65 (L2), Listening: 70 (L2), Vocabulary: 1,000 (L1), Grammar: 55% (L1) → **Assigned: Level 1** (3 modules say L1, 2 say L2; majority L1)

Scenario C: Speaking: 70 (L2), Listening: 35 (L0), Vocabulary: 2,800 (L3), Grammar: 40% (L1) → **Flag for Review** (highly uneven profile — possible test anxiety or unique background)

3.3 Onboarding Flow

The onboarding process transforms a new member from signup to active daily participation within 48 hours.

Table 14 48-Hour Onboarding Sequence

Step	Time	Action	System/Channel
1	Hour 0	Complete application form (motivation, goals, time availability)	Discord #welcome channel or web form
2	Hour 0-2	Receive welcome message with community rules and level system overview	DM from Empire Bot
3	Hour 2-6	Complete 45-minute placement diagnostic test	Empire Bot or web app
4	Hour 6-8	Receive automated level assignment and personalized study plan	DM from Empire Bot
5	Hour 8-12	Assigned onboarding buddy (peer from next level up) makes contact	Discord DM
6	Hour 12-24	Attend mandatory orientation voice session (30 min) covering rules, daily loop, and community norms	Scheduled voice channel
7	Hour 24-36	Complete first day of daily execution tasks with buddy support	Level-appropriate channels

8	Hour 36-48	First checkpoint: buddy reviews Day 1 completion, answers questions, confirms understanding	Discord DM or voice
---	------------	---	---------------------

Onboarding Success Metric

Target: 90% of new members complete all 8 onboarding steps within 48 hours. Members who do not complete the onboarding flow receive automated reminders at 24-hour intervals for 3 days, then a personal outreach from a community moderator.

4. Daily Execution Loop

The daily execution loop is the engine of the Empire English Community System. It is the same fundamental structure at every level — only the content difficulty, time allocation, and specific tasks change. This operational simplicity ensures learners can focus on learning, not on understanding the system.

4.1 The Core Learning Engine

THE EMPIRE DAILY LOOP

Every learner completes these six task categories every day, in this order:

Order	Task Category	Type	Purpose
1	Accent Training	Active Production	Build native-like pronunciation habits
2	Vocabulary Acquisition	Active Production	Expand usable word inventory
3	Shadowing Practice	Active Production	Develop rhythm, intonation, and listening
4	Speaking Mission	Active Production	Build real speaking fluency and confidence
5	Listening Immersion	Input Processing +	Train ear for native speed and patterns
6	Writing Practice	Active Production	Reinforce grammar and vocabulary
7	Community Participation	Social Practice	Apply skills in real conversations

4.2 Morning Session Structure

The morning session focuses on **foundation building** — pronunciation, vocabulary, and shadowing. These tasks require high concentration and are best completed when mental energy is highest.

Table 15 Morning Session Protocol (All Levels)

Task	L0 Time	L1 Time	L2 Time	L3 Time
Accent Training	20 min	20 min	25 min	30 min
Vocabulary	20 min	20 min	20 min	20 min
Shadowing	15 min	20 min	25 min	30 min
TOTAL	55 min	60 min	70 min	80 min

Morning Session Execution Rules

- **Accent Training First:** Always complete pronunciation work before any other task. Fresh vocal muscles produce better phoneme practice.
- **Record Everything:** Every accent drill and shadowing session must be recorded. Learners submit recordings to the AI evaluation system for feedback.
- **No Skipping:** Morning session tasks must be completed in order. Vocabulary cannot be done before accent work. Shadowing cannot be done before vocabulary.
- **Same Time Daily:** Learners should complete morning sessions at the same time every day to build habit strength. Recommended: within 2 hours of waking.

4.3 Afternoon/Evening Session

The afternoon/evening session focuses on **application and integration** — speaking missions, listening immersion, writing practice, and community participation. These tasks apply the morning's learning in communicative contexts.

Table 16 Afternoon/Evening Session Protocol (All Levels)

Task	L0 Time	L1 Time	L2 Time	L3 Time
Speaking Mission	20 min	25 min	30 min	35 min
Listening Immersion	15 min	20 min	25 min	30 min

Writing Practice	15 min	20 min	25 min	30 min
Community Participation	15 min	25 min	30 min	30 min
TOTAL	65 min	90 min	110 min	125 min

Afternoon/Evening Execution Rules

- **Speaking Before Listening:** Speaking missions must be completed before listening immersion. Speaking while mentally fresh produces better output.
- **Community Last:** Community participation always comes last. It serves as the "application layer" where learners use what they practiced earlier.
- **Voice Lounges Required:** Community participation must include at least one voice conversation. Text-only participation does not satisfy this requirement.
- **Submit for Feedback:** Speaking recordings and writing submissions must be posted in designated feedback channels for AI or peer evaluation.

4.4 Weekend Intensive Protocol

Weekends use a different structure focused on **review, integration, and extended practice**. The weekend protocol replaces the daily loop with three intensive blocks.

Table 17 Weekend Intensive Structure

Block	Saturday	Sunday
Block 1 (Morning)	Weekly Review: Accent recordings replayed, errors analyzed, progress noted	Accent Intensive: 45-minute deep-dive on weakest phonemes or patterns
Block 2 (Afternoon)	Extended Shadowing: 45-minute movie scene shadowing with transcription	Extended Speaking: 10-minute presentation on weekly topic, recorded
Block 3 (Evening)	Community Event: Group discussion, debate, or game night in voice lounge	Planning & Prep: Review next week's materials, set personal targets

Daily Compliance Metric

Target: 90% task completion rate per week (minimum 38 of 42 tasks completed). Learners falling below 85% receive automated alerts. Learners below 75% for two consecutive weeks are flagged for personal intervention by a community moderator.

5. American Accent Training System

The American Accent Training System is not an add-on or bonus feature. It is integrated into every level from day one. Learners practice pronunciation, rhythm, and intonation alongside vocabulary and grammar from their very first session. This parallel development ensures that fluency and accent improvement happen simultaneously, not sequentially.

5.1 Phonetics Foundation

All learners begin with mastery of the 44 English phonemes. Without individual phoneme control, connected speech and accent refinement are impossible.

The 44 Phonemes: Learning Sequence

Table 18 Phoneme Mastery Sequence (Level 0)

Week	Vowels (20 total)	Consonants (24 total)
1-2	/i/ (sheep), /I/ (ship), /e/ (say), /ae/ (cat)	/p/, /b/, /t/, /d/, /k/, /g/ — stops
3-4	/a/ (father), /o/ (go), /U/ (book), /u/ (food)	/f/, /v/, /s/, /z/, /th/, /TH/ — fricatives
5-6	/er/ (bird), /@/ (about), /E/ (bed), /A/ (hot)	/m/, /n/, /N/ (sing), /h/, /w/, /j/ — nasals/glides
7-8	Diphthongs: /aI/ (my), /aU/ (now), /oI/ (boy), /I@/, /e@/, /U@/	/tS/ (chair), /dZ/ (jump), /l/, /r/ — affricates and liquids

Phoneme Practice Protocol

Each phoneme practice session follows this structure:

- Isolation (3 min):** Produce the phoneme in isolation 20 times, recording and comparing to native reference
- Minimal Pairs (5 min):** Practice contrasting the target phoneme with its nearest equivalent (e.g., sheep/ship, right/light, bat/vat)
- Word Level (5 min):** Practice 10 words containing the target phoneme in initial, medial, and final positions
- Sentence Level (5 min):** Read 5 sentences containing the target phoneme multiple times
- Recording & Analysis (2 min):** Record the best attempt and submit for AI feedback

5.2 Sound Pattern Mastery

After individual phoneme control, learners master the sound patterns that distinguish American English from other varieties.

Table 19 American English Sound Patterns by Level

Pattern	Level Introduced	Description	Example
R-colored vowels	Level 0 (Week 5)	Vowel + /r/ combinations: /ar/, /Ir/, /Er/	car, here, hair
Flap T / D	Level 1 (Week 2)	/t/ and /d/ become flap [ɾ] between vowels	"water" = /wOɾ/, "butter" = /bVɾ/
Glottal Stop T	Level 1 (Week 4)	/t/ becomes glottal stop before syllabic /n/	"mountain" = /maʊnʔn/, "kitten" = /klʔn/
Dropped H	Level 1 (Week 6)	/h/ dropped in function words: he, him, her, have, had	"tell him" = /tel ɪm/, "would have" = /wʊd@v/
Schwa Usage	Level 1 (Week 8)	Unstressed vowels reduce to schwa /@/	"about" = /@baʊt/, "system" = /slst@m/
Yod Dropping	Level 2 (Week 3)	/j/ dropped after alveolar consonants	"new" = /nu/ (not /nju/), "tune" = /tun/
Dark L	Level 2 (Week 5)	/l/ becomes velarized [ɫ] at end of syllables	"feel" = /fiɫ/, "call" = /kAɫ/
NG-coalescence	Level 2 (Week 7)	/n/ + /k/ or /g/ becomes /N/	"think" = /TINK/, "finger" = /fɪNɡ@r/

5.3 Linking & Connected Speech

Connected speech is what separates robotic, word-by-word English from flowing, native-sounding speech. This is the primary focus of accent training from Level 1 onward.

Linking Rules (Taught Sequentially)

RULE 1: CONSONANT-TO-VOWEL LINKING (LEVEL 1, WEEK 3)

When a word ends in a consonant and the next word begins with a vowel, link them together as if they are one word.

Examples: "pick_up" (not "pick up"), "turn_off" (not "turn off"), "an_apple" (not "an apple")

Drill: Practice 20 C-V linked phrases daily. Record and shadow native audio of the same phrases.

RULE 2: VOWEL-TO-VOWEL LINKING WITH /W/ OR /J/ (LEVEL 1, WEEK 5)

When a word ends in a vowel and the next word begins with a different vowel, insert a glide sound (/w/ or /j/) between them.

/w/ glide: "go out" = /goUw aUt/, "two apples" = /tuw aeplz/

/j/ glide: "I am" = /aj aem/, "see it" = /sij It/, "the end" = /Tij End/

RULE 3: CONSONANT-TO-CONSONANT LINKING (LEVEL 1, WEEK 7)

When adjacent words share the same consonant sound, hold the sound longer — do not release and re-articulate.

Examples: "some milk" (hold /m/), "big game" (hold /g/), "hot tea" (hold /t/)

Exception: When the consonants are different but share the same place of articulation, the first consonant is often unreleased.

RULE 4: REDUCTION & WEAK FORMS (LEVEL 2, WEEK 2)

Function words (prepositions, articles, auxiliaries) reduce to weak forms in unstressed positions.

Common reductions: "and" = /@n/ or /n/, "to" = /t@/, "for" = /fr/, "you" = /y@/, "of" = /@v/

Practice: Shadow native conversations, specifically identifying which words reduce and which stay strong.

5.4 Rhythm, Stress & Intonation

American English is stress-timed, meaning stressed syllables occur at roughly equal intervals regardless of how many unstressed syllables fall between them. Mastering this rhythm is essential for native-like speech.

Word Stress Patterns

Table 20 Word Stress Rules by Syllable Count

Syllables	General Rule	Exceptions
2 syllables	Nouns: stress 1st syllable. Verbs: stress 2nd syllable.	Many — must be learned individually
3 syllables	Nouns: stress 1st. Verbs: stress 2nd. Adjectives: stress 1st or 2nd.	-tion/-sion words stress the syllable before the suffix
4+ syllables	Secondary stress often on 1st or 3rd syllable, primary stress toward the end	-ity words: stress 3rd from end. -graphy words: stress 2nd from end

Sentence Stress & Intonation Patterns

Content Words vs. Function Words: In natural speech, content words (nouns, main verbs, adjectives, adverbs, numbers) receive stress. Function words (articles, prepositions, pronouns, auxiliary verbs, conjunctions) are unstressed and often reduced.

Intonation Patterns:

- **Statements:** Falling intonation (pitch goes down at the end)
- **Yes/No Questions:** Rising intonation (pitch goes up at the end)
- **WH-Questions:** Falling intonation
- **Lists:** Rising on all items except the last (falling)
- **Emphasis:** Extra stress and higher pitch on the focused word
- **Tag Questions (confirming):** Falling intonation
- **Tag Questions (genuine question):** Rising intonation

5.5 Shadowing Methodology

Shadowing is the most powerful technique for developing native-like rhythm, intonation, and pronunciation. It is practiced at every level, with increasing complexity.

The 5-Phase Shadowing Protocol

Table 21 Shadowing Progression by Level

Phase	Level	Method	Audio Source
Phase 1: Blind Shadowing	Level 0	Listen to audio, repeat immediately without reading text. Focus on rhythm and intonation, not word meaning.	Slow, clear recordings (60-80 WPM). Single sentences.
Phase 2: Text-Aided Shadowing	Level 0-1	Read text while listening, repeat simultaneously with audio. Match speed and rhythm precisely.	Slow recordings with transcripts. Dialogues.
Phase 3: Full-Speed Shadowing	Level 1-2	Shadow native-speed audio while reading text. Match every nuance: speed, emotion, pauses, emphasis.	Podcast clips, movie scenes with subtitles.
Phase 4: Transcription Shadowing	Level 2	Listen without text, transcribe what you hear, then shadow from your transcription. Identifies listening gaps.	News segments, podcasts, movie clips.
Phase 5: Advanced Shadowing	Level 3	Shadow without text, matching emotional tone, regional variations, and personality. Record and compare for micro-differences.	Stand-up comedy, interviews, fast dialogues.

Shadowing Best Practices

- **Same segment 5 times:** Shadow the same 30-60 second clip 5 times before moving to a new clip. Mastery comes from repetition, not variety.
- **Record the 5th attempt:** Always record your final shadowing attempt and compare it to the original. Identify specific differences.
- **Stand up while shadowing:** Posture affects breathing and vocal production. Standing produces better phoneme output.
- **Exaggerate at first:** In early phases, over-pronounce rhythm and intonation. Gradually refine toward natural production.
- **Daily minimum:** Never shadow for less than 15 minutes. Optimal: 25-30 minutes for Level 2+.

5.6 Progressive Accent Refinement

Accent training is not a single course — it is a continuous refinement process that runs parallel to all other learning. The following table shows the accent focus at each level.

Table 22 Accent Training Progression by Level

Focus Area	Level 0	Level 1	Level 2	Level 3
Phonemes	Master all 44 in isolation	Refine connected speech	Automate correct production	Micro-adjustments for precision
Word Stress	Basic 2-syllable patterns	3-4 syllable words	Complex and exceptional patterns	Native-like stress intuition
Linking	C-V linking introduced	All linking rules	Automatic linking in speech	Subtle linking variations
Rhythm	Basic stress-timed feel	Content vs. function words	Natural rhythm in long sentences	Native-like timing and flow
Intonation	Basic rising/falling	Question vs. statement patterns	Emphasis, lists, complex patterns	Emotional nuance, sarcasm, humor
Reductions	Basic contractions	Weak forms of function words	Advanced reductions, elisions	Regional variation awareness
Shadowing	Blind, slow audio	Text-aided, natural speed	Full-speed, transcription	Advanced, emotion-matching

Accent Training Time Allocation

Accent training represents 25-30% of total daily study time at every level:

Level 0: 30 min/day (20 min phoneme drills + 10 min shadowing accent focus)

Level 1: 40 min/day (20 min stress/rhythm + 20 min shadowing with linking focus)

Level 2: 50 min/day (25 min linking/reduction + 25 min intensive shadowing)

Level 3: 60 min/day (30 min micro-phonetics + 30 min advanced shadowing)

6. Learning Materials Library (Integrated Encyclopedia)

The Learning Materials Library is a structured, AI-generated knowledge base that supports learners at every level. Unlike traditional textbooks, this library is dynamically generated, continuously updated, and personalized to learner needs. It contains six core components: simplified grammar, organized vocabulary, speaking templates, writing frameworks, cheat sheets, and immersion resources.

6.1 Simplified Grammar System

The Empire English grammar system eliminates traditional grammar instruction and replaces it with **usage-based learning**. Learners acquire grammar through practice, not rules. The grammar library serves as a quick-reference tool, not a primary learning resource.

Grammar Library Structure

Table 23 Grammar Library Components

Component	Content	Format
Pattern Cards	One grammar pattern per card: present simple, past simple, present perfect, conditionals, passive voice, question forms, reported speech	Visual card with pattern formula, 3 examples, 1 common error. One page per pattern.
Quick Fix Index	Top 50 errors made by learners at each level, with corrections and explanations	Searchable database organized by level and error type
Template Sentences	200 high-utility sentence templates that cover 80% of daily communication needs	Organized by function: requests, opinions, descriptions, comparisons, time references
Verb Conjugation Tables	100 most common verbs with all tense forms	Quick-reference table, one verb per row

Grammar Learning Principle: Pattern First, Rules Second

Grammar is not taught through explanation. It is acquired through:

- 1. **Exposure:** Learners see the pattern in context 20+ times before any explanation
- 2. **Imitation:** Learners use the pattern in structured speaking missions before understanding why
- 3. **Correction:** AI feedback corrects errors in real-time
- 4. **Reference:** Pattern Cards provide explanation only when the learner seeks it

6.2 Vocabulary Architecture

Vocabulary is organized by frequency, level, and function — not by arbitrary thematic categories. Every word in the system is chosen for its utility in real communication.

Vocabulary Organization

Table 24 Vocabulary Structure by Level

Level	Word Count	Organization	Acquisition Method
Level 0	500 words	100 highest-frequency words per week, grouped by function (greetings, numbers, food, family, actions)	Image association + spoken repetition + sentence use
Level 1	1,000 additional	Survival vocabulary: transportation, shopping, health, weather, emotions, time expressions	Context sentences + scenario practice + flashcard review
Level 2	1,500 additional	Communication vocabulary: opinions, abstract concepts, professional terms, cultural references	Collocation learning + idiomatic usage + active production
Level 3 Unlimited	Advanced nuanced vocabulary: slang, academic terms, domain-specific language	Immersion exposure + active usage + teaching others	

Vocabulary Acquisition Protocol

Every new word follows a 5-step acquisition sequence:

- 1. **Encounter (0 min):** Word appears in context — listening material, reading passage, or speaking prompt

2. **Definition (1 min):** Learner reads/hears simple English definition, not translation
3. **Image/Context (1 min):** Word is connected to visual image or real usage context
4. **Production (3 min):** Learner uses the word in 3 original spoken sentences
5. **Review (spaced):** Word reappears in review on Day 2, Day 4, Day 7, Day 14, Day 30

Spaced Repetition Schedule

Table 25 Vocabulary Review Schedule

Review	Timing	Format
Review 1	Next day	Fill-in-blank exercise in context sentence
Review 2	2 days after first review	Use word in original spoken sentence (recorded)
Review 3	3 days after second review	Match word to definition + use in written sentence
Review 4	7 days after third review	Verbal definition and example without prompts
Review 5	14 days after fourth review	Use word correctly in voice lounge conversation

6.3 Speaking Templates

Speaking templates provide ready-to-use frameworks for common communication situations. They eliminate the "what do I say?" problem and allow learners to focus on *how* they say it.

Template Library Categories

Table 26 Speaking Template Categories

Category	Templates	Level
Self-Introduction	5 templates from basic (name, origin) to advanced (personal story, values, goals)	L0-L2
Opinions & Agreement	20 templates: stating opinions, agreeing, disagreeing politely, partial agreement	L1-L3
Storytelling	10 templates: opening hooks, building tension, transitions, closing lines	L2-L3
Requests & Favors	15 templates: casual requests, formal requests, follow-ups, expressing gratitude	L0-L2

Problem-Solving	10 templates: describing problems, proposing solutions, evaluating options	L1-L3
Social Navigation	15 templates: changing topics, ending conversations, expressing confusion, asking for clarification	L1-L3
Emotional Expression	20 templates: expressing happiness, frustration, surprise, empathy, encouragement	L2-L3
Professional Communication	15 templates: emails, meetings, presentations, feedback, networking	L2-L3

Template Format

Each template follows this structure:

- **Template sentence** with blanks for personalization
- **3 completed examples** showing different contexts
- **Common variations** (formal, casual, emphatic)
- **Practice prompt** requiring learner to use the template in an original context

6.4 Writing Frameworks

Writing frameworks provide structural templates for common writing tasks. They help learners organize thoughts in English rhetorical patterns.

Table 27 Writing Framework Library

Framework	Structure	Level
Simple Description	Topic sentence + 3 detail sentences + closing sentence	L0-L1
Opinion Paragraph	Opinion statement + 2 reasons with examples + restated opinion	L1-L2
Compare & Contrast	Introduction + Point A similarities + Point B differences + Conclusion	L1-L2
Problem-Solution Essay	Hook + Problem description + 2 solutions with evaluation + Recommendation	L2-L3
Story Structure	Setting + Character + Conflict + Rising action + Climax + Resolution	L2-L3

6.5 Cheat Sheets & Quick Reference

Cheat sheets are one-page reference documents designed for rapid consultation before or during practice. They are generated by AI based on learner needs and common error patterns.

Cheat Sheet Library

Table 28 Cheat Sheet Categories

Cheat Sheet	Content	Use Case
Verb Tenses at a Glance	12 tenses with time markers and example sentences	Before writing practice or speaking missions
Linking Rules Quick Reference	5 linking rules with 3 examples each	Before shadowing or voice lounge sessions
Transition Words	50 transition words organized by function (addition, contrast, cause, sequence)	Before writing essays or extended speaking
Common Collocations	100 most common verb-noun and adjective-noun collocations	Vocabulary expansion sessions
Small Talk Topics & Questions	20 conversation openers and follow-up questions	Before community voice lounge sessions
Weekly Vocabulary Review	All words learned this week with definitions and example sentences	Weekend review sessions
Personal Error Log	Top 10 errors made by this learner with corrections	Review before any speaking or writing task

AI-Generated Personalization

All cheat sheets are personalized by the AI system based on:

1. The learner's current level and recent performance
2. Error patterns identified in speaking and writing submissions
3. Upcoming topics in the weekly curriculum
4. Frequently confused words or patterns for that specific learner

Each learner receives a different version of each cheat sheet, optimized for their individual needs.

7. Immersion Content System

The Immersion Content System provides level-appropriate, purpose-driven exposure to real English content. Every piece of content is selected or generated to serve specific learning objectives — never passive entertainment masquerading as education.

7.1 Curated Movie & Clip Library

Movies and clips provide context-rich exposure to natural speech, cultural references, and emotional expression. Each entry in the library includes specific learning instructions.

Table 29 Movie & Clip Library by Level

Level	Content Type	Duration	Learning Method
Level 0	Short animated clips with simple dialogue (Pixar shorts, TED-Ed animations)	3-5 min clips	Watch with subtitles. Pause and repeat each line. Shadow 5 selected sentences.
Level 1	Slow-paced movies with clear dialogue (Forrest Gump, The King's Speech, animated films)	10-15 min segments	Watch with English subtitles. Identify 10 new words. Shadow one dialogue scene.
Level 2	Standard movies and TV shows (Friends, The Office, modern dramas)	Full episodes or 20-min segments	Watch without subtitles. Transcribe one scene. Identify linking and reductions.
Level 3	Fast, complex content: stand-up comedy, intense dramas, news debates, reality TV	Full episodes or movies	Watch without subtitles. Analyze humor, cultural references, and emotional language. Shadow complex scenes.

Recommended Movie Library (By Level)

Table 30 Recommended Movies and Shows

Level	Movies	TV Shows
L0-L1	The Lion King, Finding Nemo, Forrest Gump, The Princess Diaries	Blue's Clues, Peppa Pig (English version), Extra English (ESL series)

L1- L2	Dead Poets Society, The Pursuit of Happiness, School of Rock, The Intern	Friends, Modern Family, The Fresh Prince of Bel-Air
L2- L3	The Social Network, Inception, La La Land, The Devil Wears Prada	The Office, Breaking Bad, Sherlock, Suits
L3	Any native content: Pulp Fiction, The Dark Knight, stand-up specials	Curb Your Enthusiasm, Atlanta, Last Week Tonight, native podcasts

7.2 Music & Song Integration

Songs provide memorable exposure to rhythm, rhyme, colloquial expressions, and emotional language. Each song in the library has specific learning tasks attached.

Table 31 Song Integration Method by Level

Level	Method	Focus
Level 0-1	Listen with lyrics. Circle rhyming words. Shadow the chorus. Learn 5 vocabulary items per song.	Rhythm, basic vocabulary, clear pronunciation
Level 2	Listen without lyrics first. Transcribe one verse. Analyze metaphors and idioms. Shadow entire song.	Listening accuracy, figurative language, connected speech in lyrics
Level 3	Analyze lyrics as poetry. Identify cultural references. Compare cover versions. Use phrases in conversation.	Cultural literacy, nuanced meaning, native expressions

7.3 YouTube & Podcast Channels

Curated YouTube channels and podcasts provide regular, updated content that exposes learners to diverse accents, topics, and speaking styles.

Table 32 Recommended YouTube Channels by Level

Level	Channels	Content Type
L0-L1	English with Lucy, BBC Learning English, Rachel's English (beginner), EngVid	Structured lessons, slow explanations, visual support

L1-L2	TED-Ed, Vox, Veritasium, Mark Rober, Yes Theory	Educational content, clear native speech, engaging topics
L2-L3	Joe Rogan Experience (clips), H3 Podcast, Lex Fridman, native vloggers	Unscripted conversation, diverse accents, cultural content

Podcast Library

Table 33 Recommended Podcasts by Level

Level	Podcasts
L0-L1	6 Minute English (BBC), ESL Pod, English Learning for Curious Minds
L1-L2	TED Talks Daily, How I Built This, Stuff You Should Know
L2-L3	The Daily, SmartLess, Armchair Expert, Lex Fridman Podcast, any native podcast

7.4 Real-Life English Exposure

Beyond media, learners need exposure to English as it is used in real daily contexts. The system provides structured real-life exposure exercises.

Table 34 Real-Life Exposure Tasks by Level

Level	Real-Life Tasks
Level 0-1	Listen to airport announcements in English. Read English product labels. Watch English street signs and advertisements. Follow simple English cooking recipes.
Level 1-2	Order food in English at international restaurants. Read English news headlines daily. Listen to English music in public spaces. Follow English social media accounts.
Level 2-3	Consume English news as primary source. Watch English livestreams. Participate in English online forums. Engage with English customer service. Think internally in English.

Content Curation Principles

Purpose over entertainment: Every piece of content must serve a specific learning objective.

Level-appropriate challenge: Content should be slightly above current level (i+1 comprehensible input), not frustratingly difficult.

Active engagement required: Learners must do something with the content — shadow, transcribe, summarize, analyze — not just watch or listen.

Cultural exposure: Content should expose learners to American culture, humor, and social norms alongside language.

8. Discord Community Architecture

The Discord server is the physical (digital) home of the Empire English Community System. It replaces the classroom with a 24/7 immersive environment where learning happens through continuous practice, peer interaction, and structured accountability. The server architecture is designed to enforce English-only communication, provide level-appropriate practice spaces, and create social pressure to execute daily.

8.1 Server Structure & Channel Map

Server Category Structure

Table 35 Discord Server Category Structure

Category	Channels	Purpose
WELCOME	#welcome, #rules, #roles, #announcements	New member onboarding, system rules, role assignment
SYSTEM	#bot-commands, #leaderboard, #support, #suggestions	Bot interactions, progress tracking, help requests
LEVEL 0 ZONE	#l0-text-practice, #l0-voice-1, #l0-voice-2, #l0-questions, #l0-showcase	Safe space for beginners to practice without intimidation
LEVEL 1 ZONE	#l1-text-practice, #l1-voice-1, #l1-voice-2, #l1-questions, #l1-showcase	Survival English practice and scenario-based conversations
LEVEL 2 ZONE	#l2-text-practice, #l2-voice-1, #l2-voice-2, #l2-debate, #l2-questions, #l2-showcase	Complex discussions, debates, and presentations
LEVEL 3 ZONE	#l3-text-practice, #l3-voice-1, #l3-voice-2, #l3-debate, #l3-mentorship, #l3-showcase	Advanced communication and mentorship activities
COMMUNITY	#general-chat, #voice-lounge-open, #events, #introductions	Cross-level social interaction and community building
ACCOUNTABILITY	#daily-check-in, #streak-tracker, #missed-day-report, #weekly-goals	Execution tracking and habit reinforcement
RESOURCES	#cheat-sheets, #video-library, #podcast-recommendations, #book-club	Shared learning materials and content discovery

FEEDBACK	#speaking-feedback, #writing-feedback, #accent-feedback, #grammar-qa	Peer and AI evaluation of learner submissions
-----------------	--	---

Channel Permission Matrix

Table 36 Channel Access by Level Role

Channel	L0	L1	L2	L3	Admin
WELCOME channels	R	R	R	R	R/W
LEVEL 0 ZONE	R/W/V	R/W/V	R (no V)	R (no V)	R/W/V
LEVEL 1 ZONE	—	R/W/V	R/W/V	R (no V)	R/W/V
LEVEL 2 ZONE	—	—	R/W/V	R/W/V	R/W/V
LEVEL 3 ZONE	—	—	—	R/W/V	R/W/V
COMMUNITY	R/W/V	R/W/V	R/W/V	R/W/V	R/W/V
ACCOUNTABILITY	R/W	R/W	R/W	R/W	R/W
RESOURCES	R/W	R/W	R/W	R/W	R/W
FEEDBACK	R/W	R/W	R/W	R/W	R/W

R = Read, W = Write, V = Voice. "—" means no access.

8.2 Voice Lounge System

Voice lounges are the heart of community learning. They provide real-time speaking practice in a supportive, level-appropriate environment.

Voice Lounge Rules

- English Only:** Speaking any language other than English results in immediate verbal warning. Repeated violations result in temporary voice mute.
- Camera Optional, Mic Required:** Voice participation requires an active microphone. Camera is encouraged but not mandatory.
- Be Supportive:** Correct errors gently. Never mock pronunciation or grammar mistakes. The goal is progress, not perfection.

4. **Stay on Topic:** Each voice lounge session has a designated topic or activity. Keep conversation relevant.
5. **No Dominating:** Speak for no more than 2 minutes at a time. Ask others questions. Include quiet members.
6. **Minimum Duration:** Joining a voice lounge for less than 10 minutes does not count toward daily community participation.

Structured Voice Sessions

Table 37 Daily Structured Voice Schedule

Time (UTC)	Session	Level	Format
08:00	Morning Warm-Up	All	Casual conversation, daily goals sharing
10:00	Accent Drill Session	L0-L1	Guided phoneme and rhythm practice
12:00	Lunch Chat	All	Informal conversation, any topic
14:00	Scenario Practice	L1	Role-play: restaurant, shopping, directions
16:00	Debate Club	L2-L3	Structured debate on assigned topic
18:00	Shadowing Circle	L1-L2	Group shadowing of selected audio clip
20:00	Story Night	L2-L3	Members tell stories, others ask questions
22:00	Evening Wind-Down	All	Reflection, next-day planning, casual chat

8.3 English-Only Environment Rules

The English-only rule is the most critical community policy. Without it, immersion fails and learners revert to their native language.

Enforcement Protocol

Table 38 English-Only Violation Enforcement

Violation	Consequence	Duration
1st violation (verbal warning)	Bot DM reminder of English-only policy	—
2nd violation	Public warning in channel + 5-min text timeout	5 minutes

3rd violation	15-minute text timeout + mandatory rules re-read	15 minutes
4th violation	1-hour text timeout + moderator discussion	1 hour
5th violation	24-hour text timeout + written commitment to comply	24 hours
6th+ violation	Case review for membership continuation	Indefinite

Exceptions

- **#10-questions channel:** Level 0 learners may ask "How do I say [native word] in English?" — one sentence translation requests only
- **Private DMs:** Private messages between members are not monitored
- **ADMIN and SYSTEM channels:** Technical discussions may use other languages if necessary

8.4 Peer-to-Peer Learning Structure

The community operates on a mentorship ladder where every learner both receives and provides support.

The Mentorship Ladder

Table 39 Mentorship Structure

Role	Responsibility	Benefit
New Member	Complete daily tasks, participate in community, ask questions	Receives guidance from onboarding buddy and community
Onboarding Buddy	Guides 1-2 new members through first 2 weeks. Answers questions, encourages participation.	Leadership practice, reinforcement of own learning, community recognition
Peer Mentor	Regularly joins voice lounges one level below to help and encourage. Provides feedback on speaking and writing.	Teaching reinforces mastery, builds confidence, earns mentorship points
Level Ambassador	Moderates level-specific channels, organizes level activities, welcomes new members to the level.	Leadership development, direct line to admins, profile badge

**Community
Moderator**

Enforces rules, resolves conflicts, runs events, supports all levels.

Free membership, leadership experience, resume credential

8.5 Accountability & Participation System

Accountability is enforced through a combination of automated tracking, peer visibility, and gamification.

Daily Check-In Protocol

1. **Morning Check-In (posted in #daily-check-in):** "Today I will complete: [accent drills, vocab, shadowing, speaking mission, listening, writing, community]"
2. **Evening Check-Out (posted in #daily-check-in):** "Today I completed: [list tasks with checkmarks]. Tomorrow I will focus on: [specific area]"
3. **Missed Day Report (posted in #missed-day-report if applicable):** "Missed [date] because [reason]. Plan to catch up: [specific plan]."

Gamification System

Table 40 Points & Achievement System

Action	Points	Achievement Badges
Complete all 7 daily tasks	100 pts	7-Day Streak, 30-Day Streak, 100-Day Streak
Post speaking recording	25 pts	First Recording, 50 Recordings, Voice Master
Submit writing for feedback	20 pts	First Essay, 50 Essays, Writing Warrior
Provide peer feedback (speaking)	15 pts	Helpful Critic, Feedback Legend
Provide peer feedback (writing)	15 pts	Editor, Grammar Guardian
Join voice lounge (10+ min)	20 pts	Social Speaker, Voice Regular, Lounge Legend
Help a Level 0-1 member	30 pts	Mentor, Guide, Empire Builder
Weekly assessment completion	50 pts	On Track, Consistent, Assessment Ace
Level advancement	500 pts	Level Up, Climber, Empire Rising
7-day perfect streak	200 bonus pts	Unstoppable, Dedicated, Elite

Weekly Leaderboard Categories

Table 41 Weekly Leaderboards

Leaderboard	Criteria	Reward
Most Consistent	Highest task completion percentage	Featured profile, "Consistency King/Queen" badge
Most Helpful	Most peer feedback provided	Mentor badge, priority for voice lounge scheduling
Biggest Improvement	Largest weekly assessment score increase	Featured in #showcase, "Rising Star" badge
Community MVP	Combination of participation, helpfulness, and consistency	Free month, direct line to admins, MVP badge

Attendance Intervention Protocol

1 missed day: Automated DM reminder

2 consecutive missed days: Onboarding buddy reaches out

3 consecutive missed days: Community moderator schedules 1-on-1 voice check-in

5 consecutive missed days: Formal re-engagement conversation. If no response, membership may be paused.

7 consecutive missed days: Membership paused. Learner can reactivate by scheduling return call with moderator.

9. Evaluation & Progress Tracking System

The evaluation system provides objective, measurable feedback on learner progress. It operates on three time horizons: weekly assessments, monthly performance reviews, and level advancement examinations. Every metric is numeric, trackable, and comparable over time.

9.1 Weekly Assessment Protocol

Every Sunday, learners complete a standardized 30-minute assessment that measures five dimensions. Results are posted automatically to the learner's dashboard and the community leaderboard.

Weekly Assessment Structure

Table 42 Weekly Assessment Components

Component	Duration	Format	Scoring
Speaking Fluency	5 min	1-minute impromptu speech on assigned topic. Recorded and submitted.	Words per minute, pause frequency, grammatical accuracy (AI-scored, 0-100)
Listening Comprehension	8 min	Listen to level-appropriate audio, answer 8 multiple-choice questions	Percentage correct (0-100)
Vocabulary Recall	5 min	20 words from the week's vocabulary: define, use in sentence, or identify	Percentage correct (0-100)
Accent Assessment	5 min	Read standardized passage aloud. AI analyzes phoneme accuracy, stress, rhythm, linking.	Accent score (0-100)
Writing Sample	7 min	Write 80-120 words on assigned prompt	Grammar accuracy, vocabulary usage, organization (AI-scored, 0-100)

Weekly Score Calculation

The Weekly Performance Score (WPS) is calculated as a weighted average:

Table 43 Weekly Score Weighting

Dimension	Weight	Why This Weight
Speaking Fluency	30%	Speaking is the primary output skill
Listening Comprehension	20%	Input skill essential for all other skills
Vocabulary Recall	15%	Foundation for all communication
Accent Assessment	15%	Differentiator of the Empire system
Writing Sample	10%	Grammar and structure reinforcement
Task Completion Rate	10%	Consistency predictor of long-term success

Weekly Score Interpretation

Table 44 Weekly Score Ranges

Score	Rating	Action Required
90-100	Excellent	Maintain current approach. Consider peer mentoring.
80-89	Strong	Minor adjustments. Focus on weakest sub-score.
70-79	Satisfactory	Review daily execution. Identify and fix gaps.
60-69	At Risk	Mandatory check-in with moderator. Revised study plan.
Below 60	Critical	Immediate intervention. Personal coaching session required.

9.2 Monthly Performance Review

At the end of each month, the system generates a comprehensive performance report that compares current scores to previous months and identifies trends.

Monthly Report Contents

- 1. **Score Trend Graph:** Weekly scores plotted over the month, with trend line
- 2. **Dimension Breakdown:** Each of the 5 dimensions compared to previous month
- 3. **Strengths & Weaknesses:** Top 2 dimensions and bottom 2 dimensions identified
- 4. **Consistency Analysis:** Task completion rate, streak length, missed days

- 5. **Community Participation:** Voice lounge hours, feedback given/received, helpfulness score
- 6. **Level Readiness Indicator:** Progress percentage toward next level advancement criteria
- 7. **Personalized Recommendations:** AI-generated specific actions for next month

Monthly Review Meeting

Every learner attends a mandatory 15-minute voice review meeting with a moderator. The meeting covers:

- 1. Review of monthly scores and trends
- 2. Celebration of wins and progress
- 3. Identification of obstacles and solutions
- 4. Setting specific targets for next month
- 5. Adjusting daily execution plan if needed

9.3 Level Advancement Examination

When a learner has met all weekly score and consistency requirements for their level, they become eligible for the Level Advancement Examination. This is a comprehensive evaluation administered by a moderator.

Advancement Exam Structure

Table 45 Level Advancement Examination

Section	Duration	Content	Passing Score
Live Speaking	10 min	5-minute prepared presentation + 5-minute Q&A with examiner	80%
Listening Test	15 min	Audio at target level speed, 15 comprehension questions	75%
Vocabulary Test	10 min	50 words from target level vocabulary	80%
Accent Evaluation	5 min	Read passage + spontaneous speech, scored by AI and moderator	75%
Writing Test	20 min	Essay on assigned topic, target word count	80%

Exam Administration Rules

- Learners may attempt the advancement exam once per month maximum
- All five sections must be passed. Failing one section means retaking the entire exam next month
- Exam is recorded for quality review and appeal purposes
- Results are posted within 48 hours
- Passing results trigger automatic role upgrade and community announcement
- Failing results include specific feedback on each section with study recommendations

9.4 Progress Metrics Dashboard

Every learner has access to a personal dashboard showing all metrics over time.

Dashboard Components

Table 46 Progress Dashboard Elements

Element		Description
Overall Progress Bar		Visual percentage showing journey from current level start to level completion
Weekly Score Chart		Line graph of last 12 weekly scores with trend line
Dimension Radar		5-axis radar chart showing current scores in speaking, listening, vocabulary, accent, writing
Streak Counter		Current consecutive days of task completion + longest streak ever
Time Invested		Total hours studied, average daily hours, most productive day/time
Community Stats		Voice lounge hours, messages sent, feedback given, mentor interactions
Next Milestone		Specific target to reach next advancement criteria, with countdown
Comparison		Anonymous comparison to level peers (percentile ranking)

10. Documentation & Proof System

The Documentation & Proof System captures evidence of transformation for three purposes: learner motivation, quality assurance, and marketing validation. Every learner builds a portfolio of progress that proves the system works.

10.1 Before/After Tracking Protocol

From day one, every learner creates a baseline recording that will later demonstrate transformation.

Baseline Capture (Day 1)

- 1. **Speaking Baseline:** 2-minute recording answering: "Introduce yourself. Where are you from? Why are you learning English? What do you hope to achieve?"
- 2. **Reading Baseline:** Recording of reading a standardized passage aloud
- 3. **Writing Baseline:** 100-word essay: "My goals for learning English"
- 4. **Accent Baseline:** AI analysis of pronunciation accuracy across all 44 phonemes
- 5. **Self-Assessment Survey:** Learner rates their own confidence in speaking, listening, reading, writing (1-10 scale)

Progress Recording Schedule

Table 47 Recording Schedule

Recording	Timing	Content
Baseline	Day 1	Introduction, reading passage, writing sample
30-Day	Day 30	Same introduction questions, same reading passage, new writing prompt
60-Day	Day 60	Same format as 30-day
90-Day	Day 90	Same format + level advancement speech if applicable
Level Complete	Upon advancement	level Full level exit examination recordings
Quarterly	Every 90 days in Level 3	Free speech on any topic, reading passage, writing sample

10.2 Speaking Recording Archive

Every speaking mission recording is archived in a searchable database. This creates a longitudinal record of improvement.

Archive Structure

- **By Date:** Chronological record of all submissions
- **By Type:** Speaking missions, shadowing recordings, assessment recordings, community voice sessions
- **By Topic:** All recordings tagged with topic keywords for easy comparison
- **By Score:** Recordings sorted by AI evaluation score to show improvement trajectory

Archive Access

- Learners can access their own full archive at any time
- Moderators can access archives for evaluation and coaching
- Learners may opt in to share selected recordings anonymized for marketing
- Level 3 learners can grant permission to use recordings as "success stories"

10.3 Transformation Story Capture

When learners reach significant milestones, the system captures their transformation story for community motivation and external validation.

Milestone Story Capture Points

Table 48 Transformation Story Capture Points

Milestone	Story Elements	Use
Level Advancement	Before/after recordings, time invested, biggest challenge overcome, advice for others	Community motivation, social proof
30-Day Streak	How daily habit was built, what changed, why they stayed consistent	Community motivation, onboarding material
90-Day Progress	Full before/after comparison, specific improvements, unexpected benefits	Case studies, marketing content

**Mastery
Certification**

Complete journey documentation, what native-
like fluency means to them

Flagship success stories,
premium marketing

Story Format

Each transformation story follows a standardized template:

1. **Before:** Starting point — level, confidence, abilities
2. **The Decision:** Why they joined and committed
3. **The Process:** Daily execution description, favorite activities, hardest parts
4. **The Breakthrough:** Moment they noticed significant improvement
5. **After:** Current abilities, confidence, what changed in their life
6. **Advice:** Specific advice for new members at their starting level
7. **Proof:** Before/after recordings, scores, metrics

11. AI Tooling & Prompt Ecosystem

The AI Engine is the content factory of the Empire English Community System. It generates learning materials, evaluates submissions, creates personalized study plans, and scales the system without requiring additional human instructors. This section contains a complete prompt library organized by function.

AI Usage Principles

AI augments, not replaces: AI generates materials and provides feedback, but human community and accountability remain central.

AI personalizes at scale: Every learner receives content matched to their level, errors, and goals — impossible with human-only instruction.

AI is consistent: AI evaluation uses the same rubric every time, eliminating instructor bias and inconsistency.

11.1 Cheat Sheet Generation Prompts

PROMPT: WEEKLY VOCABULARY CHEAT SHEET

Generate a one-page vocabulary cheat sheet for [LEVEL] English learners. Include:

1. This week's 10 target words: [WORD LIST]
2. For each word: simple English definition, one example sentence, pronunciation tip, and one common collocation
3. A "Quick Practice" section with 3 fill-in-the-blank sentences using this week's words
4. A "Common Mistakes" box showing 2 frequent errors learners make with these words
5. Format: Clean, scannable layout suitable for mobile viewing
6. Level-appropriate: Definitions use only vocabulary from [LEVEL] and below

Style: Direct, practical, no fluff. Use bold for target words. Keep sentences short.

PROMPT: GRAMMAR PATTERN CARD

Create a grammar pattern card for: [GRAMMAR TOPIC, e.g., "Present Perfect"]

Target level: [LEVEL]

Format requirements:

1. Pattern formula at the top (e.g., "Subject + have/has + past participle")
2. When to use this pattern: 3 specific situations with icons/emoji indicators
3. Three example sentences showing different uses
4. One common error example with correction
5. Time markers commonly used with this pattern (always, yet, already, since, for, etc.)
6. One practice sentence for the learner to complete

Rules:

- No complex grammatical terminology
- Use visual formatting: bold headers, bullet points
- Include a "Say This, Not That" comparison box
- Keep to one page maximum

PROMPT: PERSONAL ERROR LOG CHEAT SHEET

Based on this learner's recent submissions, generate a personalized error correction cheat sheet.

Learner level: [LEVEL]

Recent errors:

[ERROR LIST WITH EXAMPLES]

Generate:

1. "Your Top 5 Errors" section: Each error with incorrect form, correct form, brief explanation, and one practice sentence
2. "Quick Fixes" box: 3 rules that would fix 50% of this learner's errors
3. "This Week's Focus" section: The ONE error pattern to prioritize this week, with 5 practice sentences

Tone: Encouraging, not critical. Frame errors as progress indicators.

11.2 Speaking Practice Prompts

PROMPT: DAILY SPEAKING MISSION GENERATOR

Generate a daily speaking mission for a [LEVEL] English learner.

Requirements:

1. Topic: [SPECIFIC TOPIC or "choose from: daily life, opinions, descriptions, storytelling, problem-solving"]
2. Task type: [ONE OF: monologue, dialogue simulation, Q&A response, story narration, opinion argument, description]
3. Time requirement: [LEVEL-appropriate duration, e.g., 60 seconds for L0, 2 min for L1, etc.]
4. Must include: A clear prompt, 3 guiding questions to help structure the response, and 2 useful phrases/vocabulary items the learner should try to use
5. Difficulty: Match [LEVEL] vocabulary and grammar expectations
6. Recording instructions: Tell the learner exactly what to do (record, submit to #speaking-feedback)

The mission should feel like a real communication task, not a school assignment.

PROMPT: SPEAKING EVALUATION & FEEDBACK

Evaluate this speaking submission from a [LEVEL] English learner.

Transcript: [TRANSCRIPT or audio transcription]

Topic: [TOPIC]

Duration: [DURATION]

Provide feedback in this exact structure:

1. OVERALL SCORE: X/100

- Fluency: X/100 (pace, pauses, flow)
- Accuracy: X/100 (grammar, word choice)
- Pronunciation: X/100 (phonemes, stress, rhythm)
- Task Completion: X/100 (did they answer the prompt?)

2. WHAT WENT WELL: 3 specific strengths with examples from their speech

3. PRIORITY IMPROVEMENTS: Top 2 areas to focus on, with specific examples of errors and corrections

4. ACCENT NOTES: Any specific pronunciation patterns to work on (linking, stress, specific phonemes)

5. NEXT STEPS: 2-3 specific actions for their next speaking practice

Rules:

- Be honest but encouraging
- Give specific examples, not general advice
- Match feedback detail to their level (more detail for higher levels)
- Always include at least one genuine compliment

PROMPT: ROLE-PLAY SCENARIO GENERATOR

Create 3 role-play scenarios for [LEVEL] learners to practice in pairs during voice lounge sessions.

Scenario requirements:

1. Each scenario has Role A and Role B with specific objectives
2. Scenario must be realistic and practical (something they might actually encounter)
3. Include 3 vocabulary items or phrases they should use
4. Include 1 grammar pattern they should practice
5. Set a time limit: [LEVEL-appropriate, e.g., 5 min for L1, 10 min for L2]
6. Add a "twist" – an unexpected element that requires improvisation

Format each scenario as:

- Situation: [brief setup]
- Role A: [objective and character]
- Role B: [objective and character]
- Must-use vocabulary: [3 items]
- Must-use grammar: [1 pattern]
- Time limit: [X minutes]
- The twist: [unexpected element]

11.3 Listening Exercise Prompts

PROMPT: LISTENING COMPREHENSION EXERCISE CREATOR

Create a listening comprehension exercise for [LEVEL] learners.

Source audio description: [TOPIC, TYPE, e.g., "a conversation about weekend plans between two friends"]

Target speed: [WPM, e.g., 100 WPM for Level 1]

Duration: [LENGTH, e.g., 2 minutes]

Generate:

1. A transcript of the audio (natural but level-appropriate speech)
2. 8 comprehension questions:
 - 3 literal comprehension (what was explicitly said)
 - 3 inference questions (what was implied)
 - 2 detail questions (specific facts, numbers, names)
3. A vocabulary section: 5 words from the transcript with definitions
4. An accent focus: One linking or reduction pattern that appears in the transcript for learners to notice
5. Answer key with timestamps showing where each answer is found

Make the content culturally natural – how Americans actually talk, not textbook English.

PROMPT: TRANSCRIPTION EXERCISE GENERATOR

Create a transcription exercise for [LEVEL] learners.

Audio type: [e.g., "news report snippet", "podcast intro", "casual conversation"]

Topic: [TOPIC]

Length: [30 seconds / 1 minute / 2 minutes]

Generate:

1. The full transcript with these features marked:

- [LINK] where linking occurs
- [REDUCE] where words are reduced
- [STRESS] where stress falls

2. A "gapped transcript" version with 10 words/phrases removed for learners to fill in

3. A "focus pattern" section highlighting one specific connected speech pattern that appears 3+ times

4. Pre-listening vocabulary: 5 words that might be unfamiliar, with simple definitions

5. Post-transcription questions: 3 questions to check understanding of content

Level-appropriate difficulty: [LEVEL] learners should be able to transcribe 70%+ correctly after 3 listens.

11.4 Evaluation & Correction Prompts

PROMPT: WRITING ASSESSMENT & CORRECTION

Assess this writing submission from a [LEVEL] English learner.

Prompt: [ORIGINAL WRITING PROMPT]

Submission: [LEARNER'S TEXT]

Word count: [COUNT]

Provide assessment in this structure:

1. SCORES:

- Grammar Accuracy: X/100
- Vocabulary Usage: X/100 (range, appropriateness, collocations)
- Organization: X/100 (structure, transitions, coherence)
- Task Completion: X/100 (answered the prompt? appropriate length?)
- OVERALL: X/100

2. CORRECTED VERSION: Show the submission with errors corrected using this notation:

- Strike-through for deletions
- Bold for insertions
- [comment] for explanations of major changes

3. ERROR ANALYSIS:

- List the top 5 error types with frequency
- For each: example from text, correction, brief rule

4. VOCABULARY FEEDBACK:

- 3 words used well (with praise)
- 3 words that could be upgraded to more natural alternatives

5. ONE THING TO IMPROVE: The single highest-impact change for next writing

Rules: Encouraging tone. Specific examples. Actionable advice.

PROMPT: WEEKLY PROGRESS REPORT GENERATOR

Generate a weekly progress report for this learner based on their activity data.

Learner: [NAME/ID]

Level: [LEVEL]

Week: [DATE RANGE]

Data:

- Tasks completed: X/42
- Speaking recordings submitted: X
- Voice lounge hours: X
- Writing submissions: X
- Weekly assessment scores: [LIST]
- Accent score trend: [DATA]
- Community interactions: X messages, X feedback given

Generate a report with:

1. HEADLINE: One sentence summarizing the week (positive even if scores dropped)
2. WINS: 3 specific accomplishments this week
3. SCORES: Current week vs. previous week for each dimension (with up/down arrows)
4. CONSISTENCY: Task completion rate and trend
5. COMMUNITY: Participation highlights
6. FOCUS FOR NEXT WEEK: 2 specific recommendations based on weakest dimension
7. MILESTONE PROGRESS: X% toward next level advancement

Tone: Professional but warm. Celebrate effort, not just outcomes.

PROMPT: ACCENT ANALYSIS REPORT

Analyze this speaking recording for accent and pronunciation quality.

Learner level: [LEVEL]

Audio duration: [LENGTH]

Transcript: [TRANSCRIPT]

Provide analysis in this structure:

1. OVERALL ACCENT SCORE: X/100

- Phoneme Accuracy: X/100
- Word Stress: X/100
- Rhythm & Timing: X/100
- Linking & Connected Speech: X/100
- Intonation: X/100

2. PHONEME BREAKDOWN:

- 5 phonemes produced correctly (praise these)
- 3 phonemes needing work (with specific examples from the transcript)
- For each problem phoneme: the word where it occurred, what they said, what they should say

3. STRESS PATTERNS:

- 3 words where stress was correct
- 3 words where stress needs correction (with correct stress marked)

4. LINKING OBSERVATIONS:

- 2 linking opportunities they missed
- 1 linking they did correctly

5. THIS WEEK'S ACCENT HOMEWORK: 3 specific drills based on the analysis

Be specific. Quote from the transcript. Give actionable homework.

11.5 Material Generation Prompts

PROMPT: LEVELED READING PASSAGE GENERATOR

Generate a reading passage for [LEVEL] English learners.

Topic: [TOPIC, e.g., "the benefits of morning routines"]

Length: [WORD COUNT appropriate for level]

Requirements:

1. Vocabulary: 95% of words must be from the [LEVEL] word list. Maximum 5 new words, which must be defined in context
2. Grammar: Use only patterns appropriate for [LEVEL]. For Level 1: present/past simple. For Level 2: all basic tenses + conditionals
3. Sentence length: Average [X] words per sentence (shorter for lower levels)
4. Content: Engaging, practical, culturally relevant to American English contexts
5. Include: One dialogue section, one descriptive section
6. Add 5 comprehension questions at the end (literal and inferential)
7. Add a "Vocabulary in Context" section highlighting 5 useful phrases

The passage should feel like real content, not a textbook. Write for adult learners – no childish topics.

PROMPT: CONVERSATION STARTER PACK

Generate a conversation starter pack for [LEVEL] voice lounge sessions.

Theme: [THEME, e.g., "travel", "food", "technology", "movies"]

Number of participants: [X]

Generate:

1. 10 conversation questions organized by depth:
 - 3 "Warm-up" questions (easy, personal)
 - 4 "Go deeper" questions (opinions, experiences)
 - 3 "Big idea" questions (abstract, philosophical)
2. 10 useful phrases for this topic (with pronunciation notes)
3. 2 mini-debate topics with "for" and "against" starter arguments
4. 1 "story prompt" – a scenario that requires someone to tell a 2-minute story
5. 5 vocabulary words related to the theme with definitions and example sentences

Format as a voice lounge moderator guide.

PROMPT: SHADOWING AUDIO SCRIPT GENERATOR

Generate a shadowing practice script for [LEVEL] learners.

Target: [SPECIFIC SKILL, e.g., "linking R", "question intonation", "past tense narratives"]

Length: 60-90 seconds when read at natural speed

Speakers: [1 or 2 speakers]

Generate:

1. The script with these annotations:
 - Bold for stressed words
 - [LINK] markers where linking occurs
 - [PAUSE] markers for natural pauses
 - Pronunciation notes in brackets for tricky words
2. A "slow version" note: which words to stretch and which to compress
3. A "practice tip" specific to this script's target skill
4. 3 "shadowing checkpoints" – specific moments where the learner should check their rhythm match

Make the dialogue sound completely natural – like real Americans talking, not ESL material.

11.6 System Scaling Prompts

PROMPT: LEVEL ASSESSMENT QUESTION BANK GENERATOR

Generate a question bank for [LEVEL] weekly assessments.

Question type: [LISTENING / SPEAKING PROMPT / VOCABULARY / GRAMMAR / WRITING]

Number of questions: [X]

Topic area: [AREA or "mixed"]

Requirements:

1. All content must match [LEVEL] difficulty expectations
2. Questions must test real communication ability, not memorization
3. Include variety: some questions should be concrete, some abstract
4. For listening questions: specify audio speed ([X] WPM) and accent type
5. For speaking prompts: include success criteria (what a good answer includes)
6. Provide answer key with scoring rubric
7. Include difficulty rating for each question (easy/medium/hard)

Generate questions that would be fair but challenging for someone at the middle of [LEVEL].

PROMPT: PERSONALIZED STUDY PLAN GENERATOR

Create a personalized weekly study plan for this learner.

Profile:

- Name: [NAME]
- Current level: [LEVEL]
- Weekly assessment scores: [SCORES]
- Weakest dimension: [DIMENSION]
- Strongest dimension: [DIMENSION]
- Available study time per day: [X hours]
- Preferred study time: [morning/evening/split]
- Goals: [SPECIFIC GOALS]

Generate a 7-day plan with:

1. Daily task breakdown with specific time allocations
2. Focus area emphasis: extra time on [weakest dimension]
3. Specific content recommendations based on their error patterns
4. Weekend intensive structure
5. Community participation schedule (which voice sessions to join)
6. Measurable targets for the week

The plan should be realistic given their available time. Build in 10% buffer time.

PROMPT: ONBOARDING SEQUENCE MESSAGE GENERATOR

Generate the onboarding message sequence for new Empire English Community members.

Message 1 (immediate welcome):

- Welcome tone: Enthusiastic, confident, clear expectations
- Must include: Community rules summary, level system overview, first task
- Length: Under 200 words
- Include: Call to action (complete placement test)

Message 2 (after placement test completion):

- Congratulate on completing test
- Share their assigned level
- Explain what happens next (buddy assignment, orientation)
- Include: One motivational statement about their potential

Message 3 (24 hours later, if no activity):

- Gentle check-in
- Ask if they have questions
- Remind them of orientation session time
- Reduce anxiety about speaking

Message 4 (buddy introduction):

- Introduce their onboarding buddy [BUDDY NAME]
- Explain buddy's role
- Encourage them to say hello

Rules for all messages:

- Use simple, clear English (even if they're Level 2-3, they've just arrived)
- No jargon or unexplained terminology
- Every message must have exactly one clear next action
- Tone: Empire style – confident, structured, encouraging, no fluff

Prompt Deployment Guidelines

Platform: These prompts are designed for GPT-4/Claude-class models. They can be deployed through:

1. Discord bots (using OpenAI/Anthropic API integration)
2. Web application backend
3. Direct use by moderators in one-on-one sessions
4. Batch content generation for weekly curriculum updates

Personalization: Always fill in bracketed variables [LIKE THIS] with learner-specific data before sending to AI.

Quality Check: AI-generated content should be spot-checked by a moderator before distribution until the system is validated.

12. Scalability Architecture

The Empire English Community System is designed to scale from 10 VIP pilot members to millions of global users without structural redesign. Each scaling phase adds components while preserving the core daily loop and community architecture.

12.1 Phase 1: VIP Pilot (10 Members)

Phase 1 — VIP Pilot	10 Members
Duration: Weeks 1-8	
Objective: Validate system mechanics, gather feedback, identify friction points	
Architecture	
• Platform: Single Discord server with all channels • Staffing: 1 founder/admin + 1 moderator • AI Integration: Basic Discord bot for prompt delivery and simple evaluation • Content: AI-generated materials, manually reviewed before distribution • Assessment: Manual evaluation by moderator with AI-assisted scoring • Onboarding: Personalized 1-on-1 onboarding for each member	
Key Metrics	
• Daily task completion rate (target: 85%+) • Voice lounge participation (target: 5+ hours/week per member) • Weekly assessment score improvements (target: 5+ point weekly gain) • Member retention (target: 90%+ at 4 weeks, 80%+ at 8 weeks) • Qualitative feedback: friction points, confusing elements, missing features	
Exit Criteria for Phase 1	
Phase 1 completes successfully when: 8+ of 10 pilot members complete the 8-week program, weekly scores show consistent improvement, and qualitative feedback identifies no critical system flaws.	

12.2 Phase 2: Early Growth (100 Members)

Phase 2 — Early Growth

100 Members

Duration: Months 3-6

Objective: Automate onboarding, implement community self-management, refine AI evaluation

Architecture Changes from Phase 1

- **Platform:** Single Discord server with automated role management
- **Staffing:** 1 admin + 2 moderators + 4 Level 3 ambassadors (volunteer)
- **AI Integration:** Automated placement testing, AI-generated daily missions, automated weekly assessment scoring
- **Content:** Fully AI-generated with spot-checking (10% sample review)
- **Community:** Peer mentorship program formalized, onboarding buddies assigned automatically
- **Tracking:** Simple dashboard showing individual and aggregate metrics

Automation Implemented

- Automated placement test and level assignment via Discord bot
- Daily mission delivery at scheduled times
- Automated weekly assessment distribution and AI scoring
- Automatic leaderboard updates
- Automated missed-day alerts and intervention triggers
- Self-service cheat sheet generation via bot commands

Key Metrics

- Member acquisition rate (target: 10-15 new members/week)
- Onboarding completion rate (target: 90% within 48 hours)
- Moderator-to-member ratio (target: 1:25)
- AI evaluation accuracy (target: 90% correlation with human evaluation)
- Community health: voice lounge utilization, text channel activity

12.3 Phase 3: Scale (1,000+ Members)

Phase 3 — Scale**1,000 Members****Duration:** Months 7-18**Objective:** Multi-server architecture, full automation, data-driven optimization**Architecture Changes from Phase 2**

- **Platform:** Multiple Discord servers organized by level or region, connected by central hub server
- **Staffing:** 1 admin team + 5 moderators + 20 Level 3 ambassadors + automated systems
- **AI Integration:** Full AI evaluation, personalized content generation, predictive intervention (identify at-risk members before they drop out)
- **Content:** AI-generated with learner feedback loop (popular content types identified and amplified)
- **Web Dashboard:** Full-featured progress tracking, community analytics, admin controls
- **Mobile App:** iOS/Android app for daily tasks, voice lounge access, push notifications

Scaling Strategies

- **Server Sharding:** When a level exceeds 250 active members, split into multiple servers with cross-server voice capability
- **Time Zone Coverage:** Scheduled voice sessions across 24 hours covering Americas, Europe, Asia-Pacific
- **Automated Content Pipeline:** AI generates, schedules, and distributes content with no manual intervention
- **Peer Moderation:** Level 3 members earn moderation privileges through points system, reducing paid staff needs
- **Self-Organizing Communities:** Members form study groups, special interest channels, and peer accountability pods autonomously

Revenue Model (at Scale)

- **Freemium:** Free access to Level 0 content and community. Premium subscription (\$29/month) unlocks full system, AI evaluation, and advanced content
- **Corporate:** B2B offering for companies wanting English training for employees
- **Certification:** Paid mastery certification exams with official credentials
- **Affiliate:** Commission on recommended immersion content (books, apps, courses)

12.4 Phase 4: Mass Scale (10,000+ Members)

Phase 4 — Mass Scale	10,000+ Members
Duration: 18+ months	
Objective: Global platform with regional customization, AI-native experience, sustainable operations	
Architecture Changes from Phase 3	
• Platform: Custom web application + mobile app replaces Discord as primary interface (Discord remains as community option) • Staffing: Lean team: 3 core staff + AI systems + community-elected ambassadors • AI: Fully autonomous AI tutors for each learner, with escalation to human moderators only for complex issues • Localization: Support for learners from different native language backgrounds with targeted phoneme drills • Marketplace: Third-party content creators can publish Empire-compatible materials	
Mass Scale Technical Architecture	
• Microservices: User management, content generation, evaluation, community, analytics as separate services • CDN: Global content delivery for audio/video materials • Real-time Infrastructure: WebRTC for voice lounges, WebSockets for live community features • AI Pipeline: Async processing for speech evaluation, content generation, and personalization • Data Warehouse: All learner interactions stored for continuous system improvement	

Table 49 Scaling Summary Comparison

Dimension	Phase 1 (10)	Phase 2 (100)	Phase 3 (1K)			Phase 4 (10K+)		
Platform	Discord	Discord	Multi-server Web	Discord	+	Custom Discord	app	+
Staff	2	3-7	8-25			3-5 core		

AI Role	Assisted	Automated	Fully automated	Autonomous tutors
Onboarding	1-on-1 manual	Automated + buddy	Fully automated	AI-native onboarding
Evaluation	Manual + AI assist	AI scored, human spot-check	AI scored, human appeal	AI only, human escalation
Content	AI + manual review	AI + 10% spot-check	AI + feedback loop	AI + marketplace
Community	Founder-led	Moderator ambassadors	+ Self-managing AI	+ Autonomous pods

13. Implementation Roadmap

This roadmap provides a week-by-week execution plan to launch the Empire English Community System from concept to active pilot.

13.1 Weeks 1-2: Foundation

Table 50 Weeks 1-2 Action Items

Week	Task	Owner	Deliverable
W1	Set up Discord server with complete channel structure	Founder	Fully configured server with all categories and channels
W1	Create and configure Discord bot for role management and basic commands	Founder	Bot online with role assignment, level commands, leaderboard
W1	Write all community rules and guidelines documents	Founder	Rules posted in #rules, moderator guidelines document
W1	Design and document the placement test (45 questions)	Founder	Complete placement test ready for deployment
W1	Create Level 0 curriculum: first 2 weeks of daily missions, cheat sheets, vocabulary lists	Founder + AI	14 days of Level 0 content ready
W2	Create Level 1 curriculum: first 2 weeks of content	Founder + AI	14 days of Level 1 content ready
W2	Build assessment rubrics and weekly evaluation forms	Founder	Scoring rubrics for all 5 dimensions
W2	Record sample accent drill audio for Levels 0-1	Founder	Phoneme drill recordings, shadowing audio samples
W2	Create onboarding buddy assignment system	Founder	Buddy matching process documented
W2	Recruit 1 moderator (can be volunteer from network)	Founder	Moderator hired and trained

13.2 Weeks 3-4: Pilot Launch

Table 51 Weeks 3-4 Action Items

Week	Task	Owner	Deliverable
W3	Recruit 10 VIP pilot members through personal network	Founder	10 committed pilot members signed up
W3	Conduct individual intake calls with each pilot member	Founder	Intake notes, goals documented, relationships established
W3	Administer placement tests and assign levels	Bot + Founder	All 10 members placed in correct levels
W3	Assign onboarding buddies	Founder	Buddy pairs established
W3	Run orientation sessions (2 sessions to accommodate time zones)	Founder	All members oriented
W4	Day 1 of active learning — monitor closely	All staff	Day 1 execution tracked, issues identified
W4	Daily standup with moderator to review previous day	Founder	Daily issue log, quick fixes implemented
W4	First weekly assessment administered	Bot + Founder	Baseline scores for all 10 members
W4	Collect qualitative feedback from all pilot members	Founder	Feedback document with pain points and suggestions
W4	Iterate on content and processes based on Week 1 feedback	All staff	System improvements implemented

13.3 Months 2-3: Optimization

Table 52 Months 2-3 Action Items

Week	Task	Owner	Deliverable
------	------	-------	-------------

M2	Complete all Level 0 and Level 1 curriculum content (8 weeks each)	Founder + AI	Full curriculum for Levels 0-1 ready
M2	Begin Level 2 curriculum creation	Founder + AI	4 weeks of Level 2 content
M2	Implement automated weekly assessment scoring	Founder	AI scoring operational for all 5 dimensions
M2	Launch weekly voice lounge schedule with structured sessions	Moderator	8 daily sessions scheduled and promoted
M2	Implement gamification: points, streaks, leaderboards	Founder	Gamification system live
M3	First level advancement exam administered	Founder	First members advance (or detailed feedback if not)
M3	Capture first transformation stories	Moderator	2-3 before/after recordings and stories
M3	Refine AI prompts based on evaluation accuracy data	Founder	Prompt library v2.0
M3	Document all standard operating procedures	Moderator	Complete SOP manual
M3	Prepare for Phase 2 expansion	Founder	Expansion plan ready, content pipeline operational

13.4 Months 4-6: Growth Engine

Table 53 Months 4-6 Action Items

Week	Task	Owner	Deliverable
M4	Begin member acquisition for Phase 2 (target: 10-15/week)	Founder	Marketing channels active, applications coming in
M4	Complete Level 2 curriculum and begin Level 3	Founder + AI	Full Level 2 curriculum, Level 3 started
M4	Recruit and train 2 additional moderators	Founder	Moderator team: 3 people

M4	Launch referral program (members earn points for referrals)	Founder	Referral system live
M5	Reach 50 active members	All	50-member milestone
M5	Implement automated onboarding (reduce manual work)	Founder	New members onboard with minimal founder involvement
M5	Launch community-generated content (Level 3 members create materials)	Moderator	First community-generated cheat sheets and exercises
M6	Reach 100 active members (Phase 2 target)	All	100-member milestone
M6	Conduct first monthly community survey and analyze data	Founder	Community health report
M6	Plan Phase 3 architecture (web dashboard, mobile app)	Founder	Technical specification for Phase 3

Critical Success Factors

Content quality: AI-generated content must be spot-checked until accuracy is validated. One bad exercise damages trust.

Community warmth: Automated systems must not feel cold. Every automated message should feel personal and encouraging.

Founder presence: In Phase 1, the founder must be visible daily in voice lounges and text channels. Presence builds culture.

Fast iteration: Change the system based on feedback within 48 hours. Slow iteration kills momentum.

Retention over acquisition: Keep existing members happy before chasing new ones. A retained member tells friends; a churned member warns friends.

Appendices

A. Complete Prompt Library Index

This index provides quick reference to all prompts documented in Section 11 and additional prompts available in the full system.

Table 54 Complete Prompt Library Index

#	Prompt Name				Category	Section	Use Case		
1	Weekly Sheet	Vocabulary	Cheat	Cheat Sheet	Cheat Sheet	11.1	Generate reference	weekly	vocabulary
2	Grammar Pattern Card				Cheat Sheet	11.1	Create reference	one-page	grammar
3	Personal Sheet	Error Log	Cheat	Cheat Sheet	Cheat Sheet	11.1	Personalized guide	error	correction
4	Daily Generator	Speaking	Mission	Speaking	Speaking	11.2	Create tasks	daily	speaking practice
5	Speaking Feedback	Evaluation	&	Speaking	Speaking	11.2	Score and give feedback on recordings		
6	Role-Play Scenario Generator				Speaking	11.2	Create pair practice scenarios		
7	Listening Exercise	Comprehension			Listening	11.3	Generate questions	listening tests	with
8	Transcription Generator		Exercise		Listening	11.3	Create gap-fill transcription tasks		
9	Writing Correction	Assessment	&	Evaluation	Evaluation	11.4	Score and correct submissions	writing	
10	Weekly Generator	Progress	Report	Evaluation	Evaluation	11.4	Create reports	personalized	weekly
11	Accent Analysis Report				Evaluation	11.4	Detailed pronunciation analysis		

12	Leveled Reading Generator	Passage	Material	11.5	Create level-appropriate content	reading
13	Conversation Starter Pack		Material	11.5	Generate voice lounge topics	discussion
14	Shadowing Audio Script		Material	11.5	Create annotated practice scripts	shadowing
15	Assessment Question Bank		Scaling	11.6	Generate evaluation questions in bulk	
16	Personalized Study Plan		Scaling	11.6	Create individualized schedules	weekly
17	Onboarding Messages	Sequence	Scaling	11.6	Generate new member welcome flow	
18	Phoneme Drill Generator		Accent	App B	Create minimal pair practice sets	
19	Linked Speech Exercise		Accent	App B	Generate connected speech practice	
20	Intonation Pattern Drill		Accent	App B	Create intonation practice sentences	
21	Song Analysis Worksheet		Immersion	App B	Generate song-based exercises	learning
22	Movie Scene Transcript		Immersion	App B	Create film scene learning materials	
23	Debate Topic Generator		Community	App B	Create structured debate formats	
24	Writing Prompt Generator		Writing	App B	Create leveled writing assignments	
25	Grammar Error Explanation		Grammar	App B	Explain errors in language	learner-friendly

B. Discord Channel Permission Matrix (Detailed)

Table 55 Detailed Permission Matrix

Channel	@everyone	L0	L1	L2	L3	Ambassador	Moderator	Admin
#welcome	R	R	R	R	R	R/W	R/W	R/W
#rules	R	R	R	R	R	R/W	R/W	R/W

#speaking-feedback	—	R/W	R/W	R/W	R/W	R/W	R/W	R/W
#writing-feedback	—	R/W	R/W	R/W	R/W	R/W	R/W	R/W
#accent-feedback	—	R/W	R/W	R/W	R/W	R/W	R/W	R/W
#bot-commands	—	R/W	R/W	R/W	R/W	R/W	R/W	R/W
#leaderboard	R	R	R	R	R	R	R/W	R/W
#support	—	R/W	R/W	R/W	R/W	R/W	R/W	R/W

R = Read, W = Write/Send Messages, V = Voice Connect/Speak, — = No Access

C. Assessment Rubrics

Speaking Fluency Rubric (0-100)

Table 56 Speaking Fluency Scoring Rubric

Score	Words/Min	Pauses	Grammar	Description
90-100	120+	Minimal, natural	90%+ accurate	Native-like flow. Hesitation only for content, not language. Complex structures used naturally.
80-89	100-120	Occasional	80-89% accurate	Strong flow. Some pauses for word retrieval. Good variety of structures.

70-79	80-100	Regular	70-79% accurate	Adequate flow. Noticeable pauses. Basic structures dominant but some complexity.
60-69	60-80	Frequent	60-69% accurate	Halting speech. Frequent pauses for grammar construction. Mostly simple sentences.
50-59	40-60	Very frequent	50-59% accurate	Struggling to form sentences. Long pauses. Basic communication possible with effort.
Below 50	Below 40	Constant	Below 50%	Very limited production. Single words or short phrases. Communication requires significant support.

Accent/Pronunciation Rubric (0-100)

Table 57 Accent Assessment Scoring Rubric

Score	Phonemes	Stress	Linking	Rhythm	Description
90-100	95%+ correct	90%+ correct	Natural	Native-like	Consistently mistaken for native speaker. All patterns automatic.
80-89	85-94%	80-89%	80%+	Strong	Minor non-native patterns. High intelligibility. Most patterns correct.
70-79	75-84%	70-79%	60-79%	Good	Noticeable accent but fully intelligible. Some patterns correct.
60-69	65-74%	60-69%	40-59%	Fair	Clear accent. Intelligible but requires listener effort. Few linking patterns.
50-59	50-64%	50-59%	20-39%	Poor	Strong accent. Frequent phoneme errors. Minimal linking or rhythm.
Below 50	Below 50%	Below 50%	Minimal	Absent	Very difficult to understand. Heavy first-language influence on all sounds.

Writing Assessment Rubric (0-100)

Table 58 Writing Assessment Scoring Rubric

Dimension	Weight	90-100	70-89	50-69	Below 50
-----------	--------	--------	-------	-------	----------

Grammar	30%	90%+ accurate, complex structures	75-89%, good variety	60-74%, basic structures	Below 60%, frequent errors
Vocabulary	25%	Advanced, precise, collocations	Good range, mostly appropriate	Adequate, some awkward choices	Limited, frequent misfits
Organization	25%	Clear structure, smooth transitions	Good structure, some transitions	Basic organization	Poor or absent structure
Task Completion	20%	Exceeds requirements	Fulfills all requirements	Partially fulfills	Misses major requirements

Listening Comprehension Rubric

Table 59 Listening Comprehension Score Interpretation

Score	Level 0 (80 WPM)	Level 1 (120 WPM)	Level 2 (150 WPM)	Level 3 (Native)
90-100%	Ready for Level 1 listening	Ready for Level 2 listening	Ready for Level 3	Native-level comprehension
75-89%	On track	On track	On track	Strong comprehension
60-74%	Needs more practice	Needs more practice	Needs more practice	Good with effort
Below 60%	Struggling — intervention needed	Below level — review needed	Not ready for this speed	Significant gaps

Document Control

Version: 1.0

Last Updated: May 2026
